

Sondate XL

Optimisation Project: Quetiapine XL Tablets

Reducing Prescribing Costs by 63%, improving safety and delivering savings per patient averaging over £1000 per year.

ENABLING ANNUAL SAVINGS FOR THE NHS OF

£12 million

UNIQUE OPPORTUNITY

This impact500 Quetiapine XL Tablet Optimisation provides CCGs with an early opportunity in 2017 to realise prescribing savings, review prescribing quality and sample the unique implementation capabilities of the impact500 system enabling savings of £500 million for the NHS.

This Quetiapine XL Tablet project represents one of the highest cost savings per patient per annum of all the impact500 optimisation projects. Sondate XL delivers a cost saving per annum of up to:

£1,700
per patient

Saving per Patient per year (12 packs)	£572.04	£877.32	£877.32	£1,320.12	£1,754.52

Overview

OBJECTIVE

Quetiapine modified-release tablet products cost the NHS more than £25 million in 2016. Sondate XL, an already cost-effective brand, has recently significantly reduced its cost. Sondate XL provides savings of 66% from unspecified prescriptions. Depending on dose, Sondate XL has the potential to deliver a cost saving per patient from £500 to £1,700 per annum. This optimisation project allows your CCG to immediately realise these very significant savings. impact500 allows safe and effective implementation based on genuine patient needs and insight.

BACKGROUND OF USE

There are currently more than 290,000 packs of Quetiapine XL prescribed in Primary Care across England costing £25 million each year.

Despite the high cost and poor brand continuity 40% is still prescribed generically. This needs to be urgently addressed by all CCGs.

COST-EFFECTIVENESS OPPORTUNITY

Within England alone CCGs can save more than £12 million from their prescribing costs per annum by using this model (please see page 8 for full list of CCG savings). Sondate XL provides savings of over £1,700 per patient per annum on the 400mg dose and average savings per patient per annum of £1,000 across all doses simply through changing from a generic to a brand.

PRESCRIBING OPTIMISATION

This impact500 medicine optimisation offers all CCGs the opportunity to review and analyse their Quetiapine XL prescribing to ensure any best practice optimisations are identified.

Standard release Quetiapine should be utilised where clinically appropriate. This will further enhance cost savings and is reflected within the impact500 project interface.

SAFETY OPTIMISATIONS

Your impact500 implementation interface will identify suitable patients and ensure that they are appropriate for optimisation. The system will also identify patients with multiple optimisation opportunities, ensuring your CCG can implement this beneficial medicine optimisation with inbuilt validation.

Stock availability is an essential part of a quality optimisation. impact500 activated products all have excellent stock availability which is tracked centrally to ensure effective optimisation.

RAPID IMPLEMENTATION

It is essential that CCGs implement an effective optimisation strategy immediately. All the essential requirements to achieve this are captured within the impact500 program.

CONCLUSION

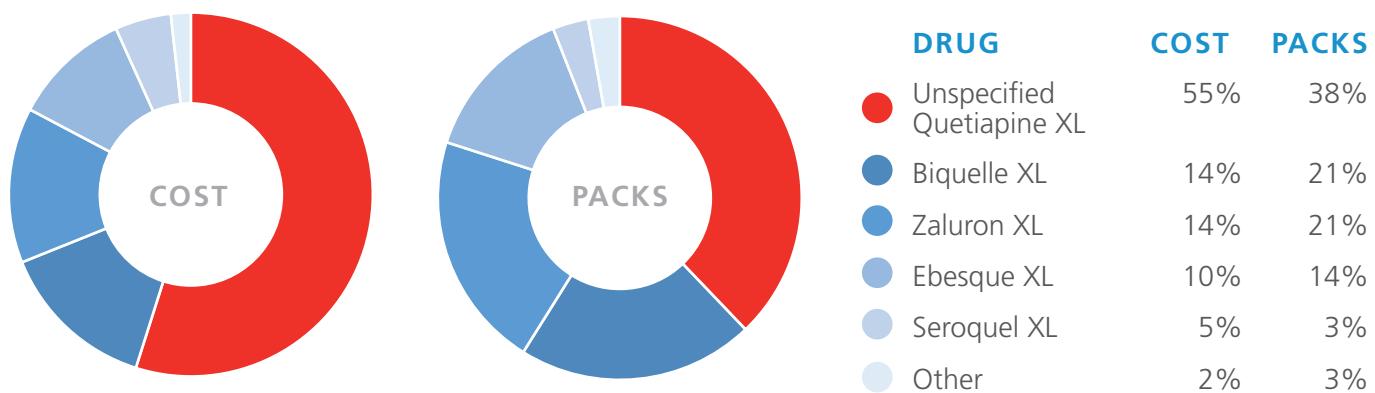

This project allows CCGs to individually save up to £250,000 from their prescribing budget per annum. All CCGs can realise the significant savings per patient that Sondate XL delivers. impact500 is available now and will provide all the tools necessary for rapid implementation to ensure the delivery of this optimisation without an increase in workload or cost and without any compromise to patient safety.

Using the shorter acting standard release Quetiapine BD, provides the greatest savings but for immediate safe switching of modified release Quetiapine, Sondate XL would appear to be the only logical brand choice for CCGs.
