BACKGROUND

Phenindione prescribing is costing the NHS £2 million per annum. This spend can be reduced by 99% by optimising patients across to Sinthrome.

The current spend on Phenindione accounts for 95% of the total spend on alternative, Vitamin K Antagonists to warfarin, whilst only representing 15% of the packs prescribed.

Phenindione 10mg and 25mg (two widely used doses) cost in excess of £500 per pack of 28 tablets. Sinthrome 1mg costs £4.62 per pack of 100 tablets.

Please identify those patients receiving Phenindione as a matter of priority and review them with a view to optimising to Sinthrome.
