

# Axalid

Optimisation Project:  
Save £1 million optimising  
Pregabalin utilisation  
within your CCG

---

ENABLING ANNUAL SAVINGS FOR THE NHS OF

**£165 million**

---

## **UNIQUE OPPORTUNITY**

---

Never has there been the ability to save such a significant amount of money for your CCG through a direct medicines optimisation.

Pregabalin is the most expensive Primary Care drug for the NHS and is now available with a 70% saving for CCGs wishing to adopt this project.

# Overview

## OBJECTIVE

Pregabalin is currently the most expensive drug for the NHS costing over £300 million per year. Generic pregabalin is available but remains reimbursed at £64.40 per pack for all doses due to the recent court decision to uphold the patent protection for Lyrica for certain specific indications.<sup>1</sup>

A new cost-effective brand of pregabalin, called Axalid, enables your CCG to finally realise savings of 70% with the ability to deliver overall NHS savings in excess of £10 million per month.

This document allows your CCG to immediately realise these savings. impact500 allows safe and effective implementation whilst ensuring that your region will not encounter any prescribing restrictions that could result in legal infringements.

## BACKGROUND OF USE

There are more than 350,000 packs per month prescribed in Primary Care across England costing over £25 million each month.

Of this 31% is Lyrica, 7% Alzain and Rewisca (which are discounted up to 40% on the generic price) and the remainder is prescribed generically at £64.40 per 56 capsules (independent of strength). This month sees a new brand Axalid launched, which provides a dramatic reduction in price of 70%, costing just £19.95 per pack.

Optimisation opportunities providing such significant savings for the NHS are very infrequent. A Pregabalin Optimisation strategy must be a top priority for all CCGs and needs to be implemented safely, efficiently and in a legally compliant manner. impact500 will allow you to do this using a completely integrated medicines management solution free of charge for all GP Practices.

## COST-EFFECTIVENESS OPPORTUNITY

Over 100 CCGs can save in excess of £1 million from their prescribing costs in 2017 by using the impact500 implementation model (Please see page 22 for full CCG savings breakdown). This project will create more savings for your CCG than any other prescribing project in 2017, but every month of delay will result in an average loss per CCG of over £90,000.

## PRESCRIBING OPTIMISATION

Many prescriptions for pregabalin are written for TDS utilisation or two tablets at a time. This creates further wastage especially in view of the standardised price range and creates the potential for significant further savings from this medicines optimisation opportunity.

## SAFETY OPTIMISATIONS

Your impact500 implementation interface will identify suitable patients and ensure that they are appropriate for optimisation. It enables you to implement this medicines optimisation so that no patent extensions granted to Pfizer are breached.<sup>1</sup>

## RAPID IMPLEMENTATION

To realise these astonishing savings there needs to be an effortless and effective implementation strategy. All the essential requirements to achieve this are provided through your impact500 interface.

## CONCLUSION

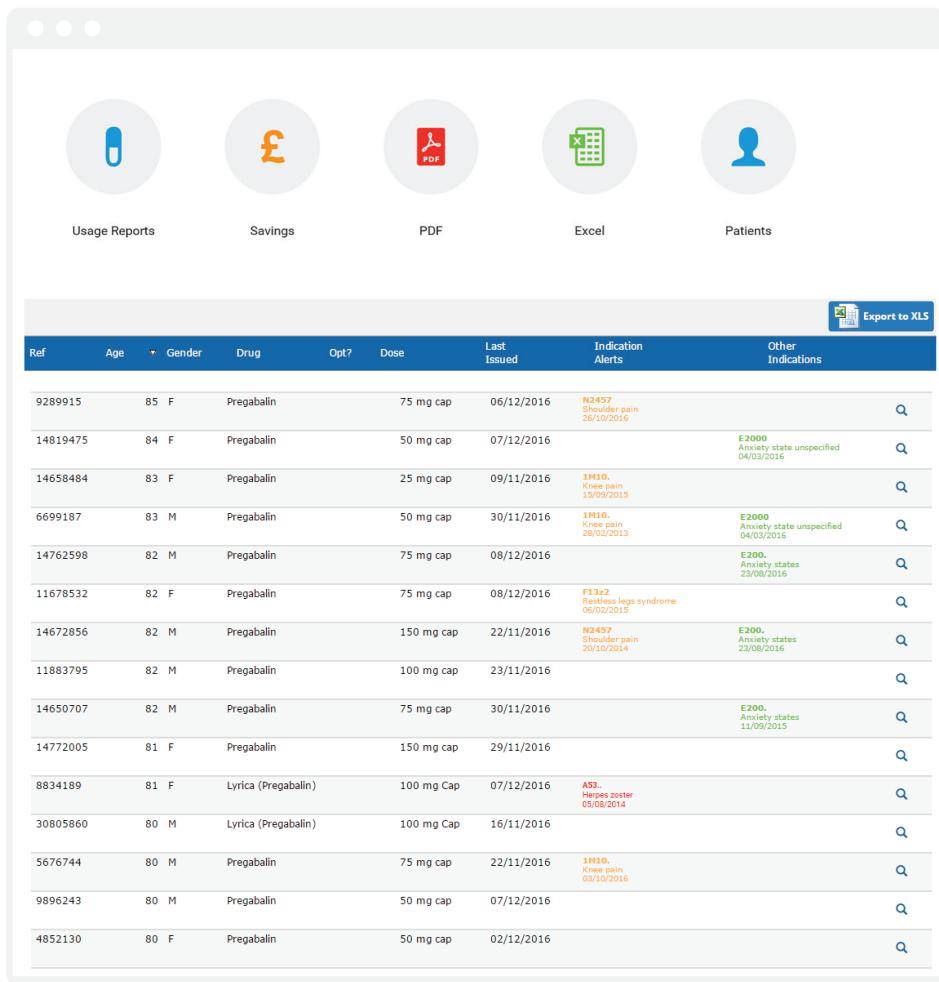

This project allows your CCG to make over £1 million in savings from your prescribing budget. You will receive the class leading prescribing safety system, impact500, from the CCG Prescriber team. Your CCG will then have all the tools necessary for rapid implementation to ensure the delivery of this optimisation without an increase in workload or cost and without any risk of legal infringements.

<sup>1</sup>[www.pfizer.co.uk/latest-news/2016-10-13-pfizer-statement-court-appeal-decision-regarding-lyrica%C2%AE-pregabalin-pain](http://www.pfizer.co.uk/latest-news/2016-10-13-pfizer-statement-court-appeal-decision-regarding-lyrica%C2%AE-pregabalin-pain)

<sup>2</sup>This Project is being supported by the manufacturers of Axalid and Prescribing Services Ltd.

# Effective and Targeted Implementation

Ensure your projects are implemented effectively without compromising patient safety. All medicines optimisations have potential risk. impact500 is able to filter patients less suitable for an optimisation to ensure validated, safe and effective implementation.

## UNIQUE FUNCTIONALITY

impact500 is able to identify patients underlying diagnosis read codes. This is particularly relevant to the delivery of a legally compliant pregabalin medicines optimisation strategy.

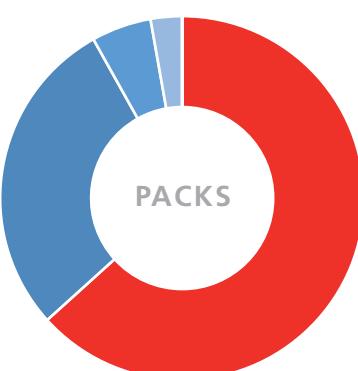

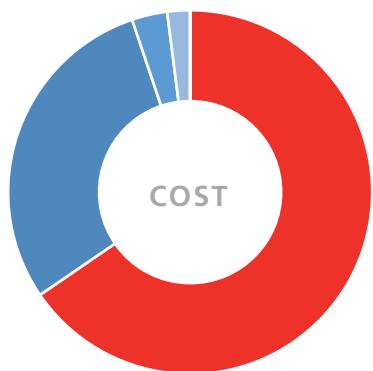

# Pregabalin Market Analysis

## CONTROL OF EPILEPSY

**Cost: Rank 2** £46.8 million/month

**Packs: Rank 19** 2.1 million packs/month

Lyrica	£64.40	110,239	£7,904,813	£5,456,039

Prescribing all Pregabalin as Axalid would save the NHS  
**£20 million per month**

## Key Message

impact500 is **free** of charge for all GP Practices. It will enable your CCG to identify, deliver and validate targeted cost-effective medicines optimisations whilst ensuring patient safety and legal compliance is absolute.

Please do not delay in activating your impact500 implementation interface.

Every day that passes is costing your CCG £3,000 - money that should be spent on improving patient care.
